

Surfa Slick Magnesium Asphalt Lutes are **33% lighter** than the older style aluminum lutes. Our lutes have the spring of steel and are highly abrasive resistant, rust proof and 100% recyclable. The handle to bar connection bracket is made from aircraft quality aluminum and does not require cross braces. Only 4-bolts are required for quick assembly. The serrated bars allows material to pass through without jamming. All of us at Surfa Slick remain committed to providing the best in asphalt lute products, so when you think of lutes, please think of **Surfa Slick**.
